Rocmec Mining Inc.

(Exploration Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2010 and 2009 (unaudited)

1- GENERAL

The interim consolidated financial statements have been prepared in accordance with accounting policies generally accepted in Canada. They follow the same accounting policies as the annual consolidated financial statements for September 30th, 2009. These financial statements do not include all required information for generally accepted accounting principles used in annual financial statements and should be read with the accompanying notes on the Company's September 30, 2009 financial statements.

2- GOING CONCERN

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles and on the basis on the going concern assumption, meaning the Company will be able to realize its assets and discharge its liabilities in the normal course of operations.

Given that the Company has not yet found a mineral property containing mineral deposits that are economically recoverable, the Company has not generated any income or cash flows from its mining exploration operations. As at June 30, 2010, the Company has a deficit and a working capital deficiency. The Company's current liquidity position is not sufficient to fund next year's administrative and exploration expenses. These conditions raise significant doubt regarding the Company's ability to continue as a going concern and the use of the going concern assumption.

The Company's ability to continue as a going concern is dependant upon its ability to raise additional financing to further explore its mineral properties and, even if the Company has been successful in the past in doing so, there is no assurance that it will manage to obtain additional financing in the future. Management is assessing its alternatives in terms of financing options to maintain its current liquidity and to meet its commitment including those related to flow-through financing.

The carrying amounts of assets, liabilities, revenues and expenses presented in the financial statements and the balance sheet classification have not been adjusted as would be required if the going concern assumption were not appropriate.

3- ACCOUNTING CHANGES

Going concern

In June 2007, The Canadian Institute of Chartered Accountants (CICA) modified section 1400, "General standards of financial statements presentation", in order to require of the management the assessment of the capacity of the Company to continue its operations over at least, but not limited to, a period of 12 months, from the balance sheet date. These new requirements come into force for the fiscal periods from January 1, 2008 and the Company applied them on October 1, 2008 in accordance with its transitional provisions. The new requirements only address disclosures and have no impact on the Company's financial results.

Rocmec Mining Inc.

(Exploration Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2010 and 2009 (unaudited)

3- ACCOUNTING CHANGES (continued)

Mining Explorations Costs

On March 27, 2009, the Emerging Issues Committee issued EIC-174, Mining exploration costs of the CICA handbook, to provide additional guidance for mining exploration enterprises the exploration expenses that can be capitalized as asset and on when an impairment test is required. This Abstract must be applied to financial statements issued after March 27, 2009. The adoption of this Abstract had no impact on the financial statements of the Company.

4- FUTURE ACCOUNTING CHANGES

Convergence with International Financial Reporting Standards

In February 2008, Canada's Accounting Standards Board (AcSB) confirmed January 1, 2011 as the changeover date to move financial reporting for Canadian publicly accountable enterprises to the International Financial Reporting Standards ("IFRS"). The Company will adopt the IFRS for the interim financial statement that will end on December 31, 2011 and the Company is not able to assess the impact of the application of the IFRS will have on its financial statements.

5- SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The financial statements are prepared using the historical cost method, except for certain financial instruments that are recognized at fair value. No information on fair value is presented when the carrying amount corresponds to a reasonable approximation of the fair value.

Use of estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts recorded in the financial statements and notes to financial statements. Significant estimates include these related the estimated useful of property, plant and equipment, the recoverability of mineral properties and deferred exploration expenses and thermal fragmentation - exclusive licence, future income taxes and stock-based compensation. While management believes that these estimates and assumptions are reasonable, actual results could vary significantly.

Principles of consolidation and subsidiary name change

The consolidated financial statements include the accounts of the Company and its subsidiary; Rocmec Technologies Inc. (formerly 9167-6718 Quebec Inc.) On March 24th, 2010, the subsidiary adopted a new name. This subsidiary is presently inactive.

Rocmec Mining Inc.

(Exploration Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2010 and 2009 (unaudited)

5- SIGNIFICANT ACCOUNTING POLICIES (continued)

Property, plant and equipment

Property, plant and equipment are accounted for at cost. Amortization is based on their estimated useful life less estimated residual value using the straight-line method at the following annual rates:

Equipment	5 to 10 years
Mill plant	5 to 10 years
Computer equipment	2 to 4 years
Automotive equipment	4 years
Leasehold improvements	lease term - 3 years
Telephone system	5 years

Funds held for exploration and development charges

Exploration funds consist of cash and represent the unexpended proceeds of flow-through financing agreement under which the Company has committed to spend the amounts on exploration.

Mining rights tax credit and tax credit for mining exploration companies

The Company is entitled to a refundable mining rights tax credit on mining exploration expenses incurred in Quebec. Furthermore, the Company is entitled to the refundable tax credit that may reach 38.75% for mining exploration companies on qualified expenditures incurred after March 29, 2001.

Those tax credits are recorded and accounted for against the costs incurred provided that the Company has reasonable assurance that these credits will be received.

Mining properties and deferred exploration and development charges

Mining properties, composed of mining exploration permits, claims and options to acquire undivided interests in properties are accounted for at their acquisition cost.

Costs related to the acquisition, exploration and development of mining properties are capitalized by property until the commencement of commercial production. If commercially profitable ore reserves are developed, capitalized costs of the related property are reclassified as mining assets and amortized on the unit of production method. If it is determined that capitalized acquisition, exploration and development costs are not recoverable over the estimated economic life of the property, or the project is abandoned, the project is written down to its net realizable value.

Management assesses recoverability of amounts recorded for mining properties and deferred exploration expenses by considering whether results from exploration work justify further investment, the confirmation of the interest of the Company in the mining claims, the ability of the Company to obtain the necessary financing to complete the development and future profitable production or the disposal of the properties for proceeds in excess of their carrying value.

Rocmec Mining Inc.

(Exploration Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2010 and 2009 (unaudited)

5- SIGNIFICANT ACCOUNTING POLICIES (continued)

Thermal fragmentation - Exclusive licence

The thermal fragmentation exclusive licence is accounted for at cost and amortization will be based on its estimated useful life using the straight-line method over 10 years beginning with the first of the following: Beginning of the commercial production using the thermal fragmentation or the sale of the first sub license of thermal fragmentation.

Impairment of long-lived assets

Property, plant and equipment and the exclusive licence thermal fragmentation subject to amortization are tested for recoverability when events or changes in circumstances indicate that their carrying amount may not be recoverable. The carrying amount of a long-lived asset is non-recoverable when it exceeds the sum of the undiscounted cash flows expected from its use and eventual disposal. In such a case, an impairment loss must be recognized and is equivalent to the excess of the carrying amount of a long-lived asset over its fair value.

Foreign currency translation

Transactions pertaining to the statement of earnings are translated at the rate of exchange prevailing at the date of the transaction. Monetary assets and liabilities resulting from these transactions are translated at the rate of exchange in effect at the balance sheet date. Non monetary assets are translated at the exchange rate in effect at the transaction date. Exchange gains or losses are included in earnings of the year.

Share capital

Capital stock issued for non-monetary consideration is generally recorded at the quoted market price of the shares at the date of agreement. The resource expenditure deductions for income tax purposes related to exploration and development activities funded by the proceeds of the flow-through share arrangements are renounced to investors in accordance with tax legislation. Under the liability method of accounting of income taxes, the future income taxes related to temporary differences arising at the renunciation are recorded at that time together with a corresponding charge in the share issue expense.

Fair value of the warrants

Proceeds from unit placements are allocated between shares and warrants issued using the Black-Scholes pricing model to determine the fair value of warrants issued.

Basic and diluted net loss per share

Net loss per share is calculated using the weighted average number of outstanding shares during the year. The diluted net loss per share is equal to the basic net loss per share due to the anti-dilutive effect of convertible debenture, stock options, warrants and borkers' units options described in note 14.

Revenue recognition

The Company recognizes revenue from metals when they have been delivered and title has passed to a purchaser. Up until beginning of commercial production, revenue are accounted for in decrease of deferred explorations and development charges.

The Company recognizes revenue from contract income under the percentage of completion method. Under this method, contract income and profit are recognized proportionately with the degree of completion. The degree of completion is determined based on the number of linear feet completed. Losses on contract are recognized when total cost estimates indicate a loss.

Rocmec Mining Inc.

(Exploration Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2010 and 2009 (unaudited)

5- SIGNIFICANT ACCOUNTING POLICIES (continued)

Stock-option plan

The Company uses the fair value method based on the Black-Scholes pricing model to record the compensation cost related to the issue of stock options to its employees, directors, officers and consultant to earnings or deferred exploration expenses over the vesting period with a corresponding credit to contributed surplus. The expense is recorded over the vesting period for employees and the performance period for consultants. Any consideration received when options are exercised is credited to capital stock together with the related compensation cost recorded previously as contributed surplus.

Share issue expenses

Share issue expenses are recognized in the statement of deficit.

Income taxes

Future income taxes are a result of the future tax consequences attributable to differences between the financial statements carrying amounts for existing assets and liabilities and their respective tax bases. Future tax assets are accounted for only if the management believes that it will be more likely than not that future tax assets will be recoverable. Future tax assets and liabilities are measured using enacted or substantively enacted tax rates expected to apply to taxable income in the fiscal years in which those temporary differences are expected to be recovered or settled.

Financial instruments - Recognition and measurement

All financial instruments are required to be measured at fair value on initial recognition, except for certain related party transactions. Measurement in subsequent periods depends on whether the financial instrument has been classified as held-for-trading, available-for-sale, held-to-maturity, loans and receivables, or other liabilities.

Financial assets and liabilities classified as held-for-trading are required to be measured at fair value, with gains and losses recognized in net earnings.

Financial assets classified as held-to-maturity, loans and receivables and other financial liabilities (other than those held-for-trading) are required to be measured at amortized cost using the effective interest method.

Available-for-sale financial assets are required to be measured at fair value, with unrealized gains and losses recognized in Other Comprehensive Income (loss). Investments in equity instruments classified as available-for-sale that do not have a quoted market price in an active market should be measured at cost.

Transaction costs are recognized in earnings as they are incurred.

Embedded derivatives that are not closely related to the host contract must be separated and classified as held-for-trading financial instruments. They are therefore measured at fair value and changes in fair value are recognized in earnings and the transaction costs related to these embedded derivatives are recognized in earnings as administrative expenses. As at June 30, 2010 and 2009, the Company has no financial instruments including an embedded derivative that should be separated from the host contract.

Rocmec Mining Inc.

(Exploration Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2010 and 2009 (unaudited)

5- SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial instruments - Recognition and measurement (continued)

The Company has adopted the following classification:

Cash and cash equivalents, investment in shares and funds held for exploration and development charges are classified as "Financial Assets Held for Trading".

Investment in shares is classified under level I that is valuation based on active market price in determining fair value.

Trade accounts receivable and other receivable are classified as "loans and receivables".

Accounts payables and accrued liabilities, loans, long-term debt and debentures are classified as "Other Financial Liabilities".

6- CAPITAL MANAGEMENT

In terms of capital management, the objectives of the Company are to preserve its ability to continue its mining exploration and development of its thermal fragmentation mining method as well as its current bulk sampling program at the Rocmec 1 mining site. If necessary, the Company raises funds by private placement of common shares, in loans and debentures in order to support the development of its activities. The Company does not intend to pay dividend in the foreseeable future.

The Company includes loans, long-term debt, debentures, share capital, contributed surplus, warrants and equity component of convertible debenture in the definition of capital for a total amount of \$49,622,253 (\$44,606,937 - September 30, 2009).

The property in which the Company has an interest is in the development stage and the use of the thermal fragmentation mining method by other mining companies is also in the development stage; As such, the Company is dependant on external financing to fund its activities.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no significant changes in the Company's approach to capital management during the period ended June 30, 2010. The Company does not have any externally imposed capital requirements neither regulatory nor contractual requirements to which it is subject, other than those related to its flow-through financing agreements for which the Company is in compliance during the year.

7- FINANCIAL INSTRUMENTS

The Company is exposed to various financial risks that result from both its operations and its investment activities. Financial risk management is carried out by the Company's management.

Rocmec Mining Inc.

June 30, 2010 and 2009 (unaudited)

7- FINANCIAL INSTRUMENTS (continued)

Credit risk

The credit risk is the risk associated with non-payment of financial obligations by the customers of the Company. The credit risks that the Company faces are mainly attributable to recovery of various accounts receivable. Cash and funds held for exploration and development charges are held by a Canadian Chartered Bank in which management believes that the risk of loss is minimal but the Company is subject to concentration of credit risk. The maximum risk is equivalent to the carrying value.

Liquidity risk

The liquidity risk is the risk that the Company experiences difficulty honoring commitments related to financial liabilities. The management approach concerning cash management is to ensure, as much as possible, that the Company has the necessary funds to meet its financial obligations at maturity. If considered necessary, management renegotiates extensions to maturity dates to balance the needs in cash and financings.

The Company expects to satisfy obligations under accounts payable and accrued liabilities, interest payment on convertible debentures and borrowings and repayment of the short-term part of long-term debts and convertible debentures. Management intends to continue, as was done in the past, to finance its activities by raising funds by private equity investments, in loans or debentures. Even if it succeeded in financing its activities in the past, management cannot comment on the success of its future fund raising and it believes that the liquidity risk is high.

Interest rate risk

The interest rate risk is the risk that the fair value of future cash flows of a financial instrument fluctuate because of changes in market interest rates. Loans, long-term debt and debentures issued by the Company bear interest at a fixed rate thus exposing it to the risk of changes in fair value arising from interest rate fluctuations.

Exchange risk

The Company is exposed to exchange risk as a result of its contract income in foreign currency.

7- FINANCIAL INSTRUMENTS (continued)

Fair value

The fair value of long-term debt and debentures approximate the book value and are estimated using discounted cash-flow analysis, based on current corresponding borrowing rates for similar types of borrowing arrangements.

The fair value of investment in shares is measured based on the closing price.

14- SHARE CAPITAL (continued)

Common share purchase options

The Company maintains a stock option plan (the "Plan") whereby the Board of Directors may from time to time grant to employees, officers, directors of, or consultants to the Company, options to acquire common shares in such numbers, for such terms and at such exercise prices as may be determined by the Board of Directors.

The Plan provides that the maximum number of common shares in the capital of the Company that may be reserved for issuance under the Plan shall be equal to 5,000,000 common shares and that the maximum number of common shares which may be reserved for issuance to any one optionee may not exceed 5% of the common shares outstanding at the time of vest. These options must be exercised no later than 5 years after the date of vest. The options currently granted are subject to a minimum of a sixth vesting period for which options will vest gradually, except those granted to consultants providing investor relations services for which options will vest over 12 months.

The option exercise price is established by the Board of Directors and may not be lower than the market price of the common shares at the time of grant.

A summary of changes in the Company's common share purchase options are as follows:

	June 30, 2010		September 30, 2009
